VME & CPCI Ecosystems Shrinking

- Suppliers are discontinuing products
 - Components are going EOL
 - Declining sales due to need for VPX performance levels
 - A few suppliers have gone out of business

OpenVPX Making Great Strides

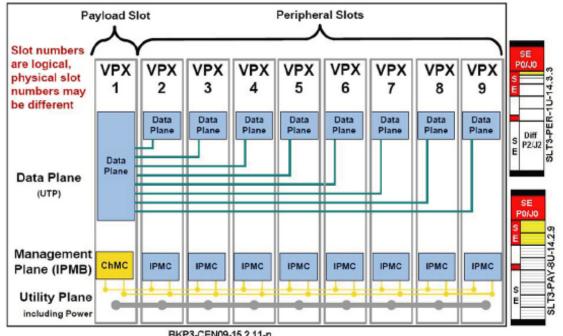

- Filling need for HPEC
 - High performance SBCs
 - High performance FPGAs, A/D, D/A, GPGPU
 - High performance interconnect: PCIe, Ethernet, others
 - Well suited for very rugged applications

• But...

OpenVPX is Not for Everyone

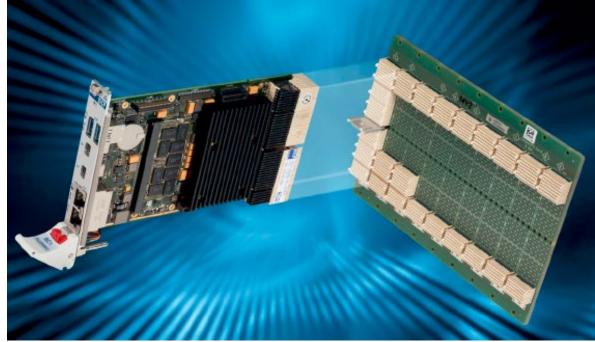

- Some applications don't need the performance
- VPX too expensive for modest performance applications

A Modern Technology for Simpler Needs

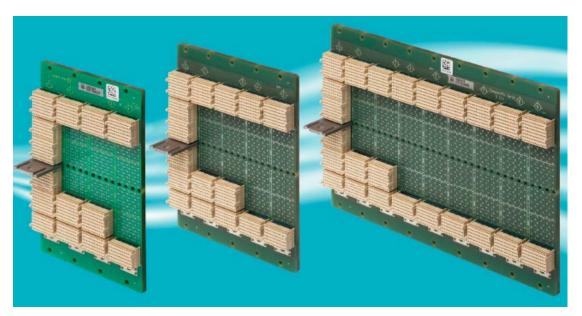

CompactPCI® Serial

CPCI-Serial Backplane

- Up to 9-slots
- Single Star or Full Mesh
- Hybrid with classic CPCI slots is possible

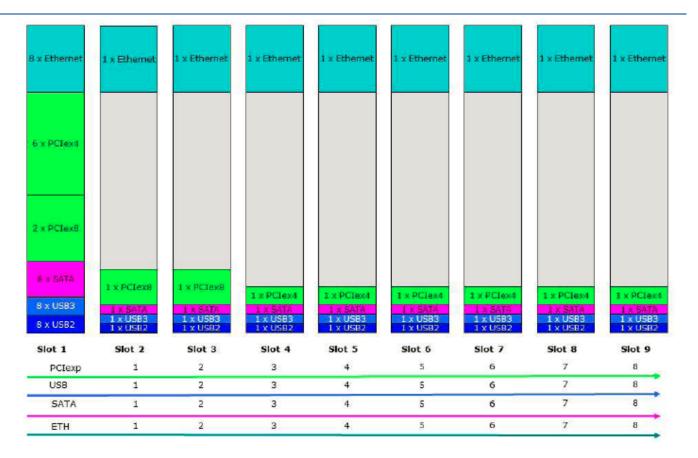

CPCI Serial Backplane Topology - Mesh

8 x Ethernet 6 x PCIex4 2 x PCIex8 8 x SATA 8 x USB3	8 x Ethernet							
8 x USB2	1 x USB3 1 x USB2	1 x USB3 1 x USB2	1 x USB3 1 x USB2	1 x USB3 1 x USB2	1 x USB3 1 x USB2	1 x USB3 1 x USB2	1 x USB3 1 x USB2	1 x USB3 1 x USB2
Slot 1	Slot 2	Slot 3	Slot 4	Slot 5	Slot 6	Slot 7	Slot 8	Slot 9
PCIexp	1	2	3	4	5	6	7	8
USB	1	2	3	4	5	6	7	8
SATA	8	7	6	5	4	3	2	1
ETH	1	2	3	4	5	6	7	8

CPCI Serial Board Examples

- Single Board Computer
- Serial I/O
- USB I/O
- Digital I/O
- Motion control
- Frame Grabbers and GPUs
- Ethernet Controller
- Ethernet Switch
- SATA and nVME storage

- XMC and PMC carriers
- PCle carriers
- PCIe expansion
- Others...

CPCI Serial Chassis Examples

12

Some of the CPCI Serial Ecosystem

- ADLink
- Advantech
- Eltec
- EKF
- Elma Electronic
- Eltec
- Fastwell
- Harting

- Kontron
- MEN Micro
- nVent Schroff
- Pixus Technologies
- ...and growing

The Future is Now!

- Futurebus "VME is going away" didn't happen
- CPCI "VME is going away" didn't happen
- Etc, etc...
- 2019: VME is going away!!!
 - Slowly still a lot of legacy designs in production
 - Very few new designs using VME (or classic CPCI)
